WORK EXPERIENCE

Oktav <i>Co-Founder & Lead Software Engineer</i>	Waterloo, ON May 2025 – Sep 2025
<ul style="list-style-type: none">Built Go/.NET backends; designed 8 services and 24 gRPC APIs; integrated OAuth2/OIDC with JWT.Cut build time 45% and tripled release speed via CI/CD and Docker containerization for 12 services.Boosted uptime to 99.9% with structured logging and tracing; reduced team MTTR by 38% via monitoring.	
Versall <i>Backend Developer & System Designer</i>	Toronto, ON Sep 2024 – May 2025
<ul style="list-style-type: none">Shipped an AI platform with 5 Node.js modules for auth, billing, scheduling, and payment processing.Engineered scalable WebSocket services with health checks and autoscaling to improve real-time UX speed.Reduced MTTR by 29% via Kafka eventing and distributed tracing for accelerated incident triage.	
Intelligent Innovations Lab <i>Software Engineering Intern</i>	Peterborough, ON Jan 2025 – Apr 2025
<ul style="list-style-type: none">Reduced tech debt 30% by documenting 6 services with 12 architecture diagrams and detailed roadmaps.Cut deployment time 50% by implementing automated GitHub Actions pipelines for 12 Docker services.Integrated Flutter and web UIs with backend services, boosting feature delivery velocity to 18 per quarter.	
Douran Co. <i>Software Engineering Intern</i>	Remote Sep 2022 – Apr 2023
<ul style="list-style-type: none">Refactored .NET backends using async I/O to boost throughput 30% and stabilize high-traffic hot paths.Optimized SQL Server and PostgreSQL schemas for 100k+ daily transactions; reduced database lock waits.Cut security incidents 15% via endpoint hardening and rigorous code reviews across backend services.	

PROJECTS

BioCheck AI 	Stack: React • ASP.NET Core • PostgreSQL • Docker
<ul style="list-style-type: none">Built a privacy-first pipeline to normalize medical results into clinician-ready reports via local APIs.	
Health Monitoring System 	Stack: Python • Go • Rust • NumPy/Pandas • OpenAI API
<ul style="list-style-type: none">Monitors temperature, pulse, and SpO₂ via fuzzy logic and GenAI (OpenAI + Google) for vital analysis.	
AI-Enhanced App Generator 	Stack: Python • SQLite • PyTorch • scikit-learn
<ul style="list-style-type: none">Built an LLM-driven GUI generator with a machine learning feedback loop and automated logging.	
Data Structures Visualizer 	Stack: React • C • CivetWeb
<ul style="list-style-type: none">Engineered a full-stack educational platform to visualize complex algorithms via interactive components.	

ACHIEVEMENTS & CERTIFICATIONS

- Top 10 Finalist at Velocity (University of Waterloo) — for Oktav, Deep Tech Initiative — 2025.
- 2nd Place — ConHacks 2025 Hackathon.
- Certified Ethical Hacker (CEH); SANS SEC 504; Linux Certifications LPIC-1 & 2.
