EDUCATION

Conestoga College | 🔗 Waterloo, ON
Advanced Diploma in Software Engineering Technology (Co-op) (GPA: 4.0/4.0) Sep 2024 – Apr 2028 (Expected)
• **Ranked 1st** in the program cohort by term GPA (Fall 2025, Winter 2026); 97% average across all courses.

SKILLS

Languages: C#, Python, C/C++, Java, TypeScript, Go, Rust, Groovy, SQL
AI/ML: RAG, GraphRAG, MCP, LangChain, LangGraph, MLflow, PyTorch, scikit-learn
Performance & Testing: JMeter, k6, dotTrace, PerfView, Grafana, Prometheus, Playwright, load testing, profiling
Frameworks: .NET Core, SignalR, gRPC, WebSockets, Kafka, Django, Node.js, React, Next.js, NumPy, Pandas
Infra & Data: Docker, Kubernetes, AWS, Azure, Jenkins, GitHub Actions, SQL Server, PostgreSQL, Redis, MongoDB

WORK EXPERIENCE

SOTI Mississauga, ON
Performance Engineer Intern (Co-op) May 2026 – Present
• Cut manual test effort **80%** by building in-house automation tooling for MobiControl performance test runs.
• Accelerated MobiControl staging sanity and health checks **84%** at equal accuracy by optimizing scenario runs.
• Isolated **CPU, memory, and SQL hotspots** per release with JMeter and dotTrace; tracked KPIs in Grafana.

AI Initiative — AI engineering & developer tooling (concurrent) May 2026 – Present
• Copilot-style JMeter agent that writes and checks JMX, taking load-test authoring from **hours to minutes**.
• Lowered Copilot credit spend **30–70%** (ledger-tracked) via an MCP server and CLI (TypeScript, 13 tools).
• Lifted agent accuracy on large repos **40%** via tree-sitter ASTs (27 languages) and a local GraphRAG code graph.

Eyval | Velocity Summer 2026 Accelerator (University of Waterloo) Waterloo, ON
Co-Founder & Software Engineer May 2026 – Sep 2026
• Built a governance layer and shared infrastructure enforcing **12 policy and audit checks** across 50+ AI agents.
• Shipped the **MVP in 6 weeks** to 3 pilot design partners by leading the Go/TypeScript control-plane build.

Conestoga Health & Science Research Lab Cambridge, ON
Research Assistant II (Data Analysis) Sep 2025 – Apr 2026
• Saved **95%** of research data prep time by automating lab study dataset pipelines in Python (Pandas/NumPy).
• Delivered **6 interactive dashboards** for 8 researchers, turning days of manual reporting into same-day results.

Oktav | Velocity (University of Waterloo) Deep Tech — Top 10 Finalist Waterloo, ON
Co-Founder & Software Engineer May 2025 – Sep 2025
• Designed **8 services and 24 gRPC APIs** in Go/.NET, secured with OAuth2/OIDC and JWT-based auth.

Versall Toronto, ON
Co-Founder & Software Engineer Sep 2024 – May 2025
• Shipped **5 Node.js backend modules** (auth, billing, scheduling, payments) plus autoscaled WebSocket services.
• **Kafka eventing and distributed tracing** across all services, giving end-to-end visibility for incident triage.

Intelligent Innovations Lab Peterborough, ON
Software Engineer Jan 2025 – Apr 2025
• **Halved deployment time** with automated GitHub Actions pipelines for 12 Docker services; cut tech debt 30%.

Douran Co. Remote
Software Engineer Sep 2022 – Apr 2023
• Raised .NET backend throughput **30%** through async I/O; tuned SQL Server for over 100k daily transactions.

PROJECTS

BioCheck AI | 🔗 *Stack: React • ASP.NET Core • PostgreSQL • Docker*
• Built a privacy-first pipeline on local APIs that turns lab results into clinician-ready reports in **under 5 seconds**.

Health Monitoring System | 🔗 *Stack: Python • Go • Rust • NumPy/Pandas • OpenAI API*
• Flags abnormal temperature, pulse, and SpO₂ at **95% accuracy** on 1,000+ readings using fuzzy logic and GenAI.

Data Structures Visualizer | 🔗 *Stack: React • C • CivetWeb*
• Built a full-stack platform with interactive, step-by-step animations of **12 data structures and algorithms**.

ACHIEVEMENTS & CERTIFICATIONS

- **2nd Place** of 40+ teams, ConHacks 2025 Hackathon — built an AI-powered incident triage tool in 48 hours.
- **Certifications:** Certified Ethical Hacker (CEH); SANS SEC 504; LPIC-1 & LPIC-2 (Linux).
